

PRESS RELEASE
May 2018

19 Technology companies selected to showcase at Venture 5i® Grenoble-Alps – 30th and 31st May

The Venture 5i® Selection Committee (financing forum organized within the Forum 5i®) has selected **19 innovative companies** to showcase during the **Venture 5i®** event on May 30th and 31st. 14 are originated from France (Alpine region), 1 is originated from Italy, 3 from Switzerland and 1 from South Korea.

The prestigious selection committee composed of national and international investors, is chaired by **Dieter Kraft, Managing Director, TRUMPF Venture GmbH (Germany)**. In total, almost 170 evaluations of pre-qualified companies were performed.

The total cumulated fundraising of these 19 companies, in several fields as B2B Services / Bio & Medtech / Agriculture & Agrofood / IT & telecommunications / Electronics / Protecting Man – Environment – Energy / Measurement Tools / Industrial Manufacturing – Material and Transport Technologies, represents nearly € 30 million, reflecting the dynamism of those projects.

❖ **B2B Services**

ABOUTGOODS COMPANY – France (74)

AboutGoods aggregates consumption data via mobile Apps to deliver decisional data for Brands, Retailers or market Research companies

MYDATAMODELS – France (06)

MyDataModels provides an Automated machine Learning SaaS platform for professionals with no or limited access to data scientists

❖ **Bio & Medtech**

CARTIMAGE MEDICAL SAS – France (38)

Our surgical imaging instruments help surgeons reduce uncertainty in real-time, to optimize tissue preservation and improve patient outcomes

GRAPHEAL – France (38)

Graphéal is addressing wound monitoring and accelerated healing using smart bandages based on graphene technology

NANOBIOSE – France (73)

Nanobiose develops innovative lab consumables and reagents for a better evaluation of drugs candidates effects on man at early stages

RHEONOVA – France (38)

Medical device for Rheological monitoring of chronic respiratory diseases: "Rheomuco by Rheonova - Switch to mucus analysis!"

SIGNIA THERAPEUTICS – France (69)

Breakthrough solution for novel antibiotics based on globally targeting the host cell - Novel & proprietary technology for drug repurposing

❖ **Agriculture & Agrofood**

BIOMEDE – France (69)

Agricultural soil depollution by plants

EMBION TECHNOLOGIES SA – Switzerland

Nutrition for better health

❖ **IT & Telecommunications**

DATAMENTO – France (38)

Hospital processors control

EYEWARE – Switzerland

Attention sensing with 3D Eye tracking

OLYMPE – Switzerland

Software is the new electricity: Olympe makes it that easy to power up innovation: real time, adaptive, distributed

UNITED MOTION IDEAS – France (69)

Reinventing the B2B market research for your innovations through an automated web based platform connecting professionals and innovations

❖ Electronics

EBIKELABS – France (38)

Ebikelabs : your interactive drive system expert

IRLYNX – France (38)

Human activities sensing for smart building and connected homes. Applications include energy savings and space management

STANDING EGG – South Korea

MCU and System development company implementing facial recognition, gate tracking and motion recognition as AI based on machine learning

❖ Protecting Man – Environment – Energy

EVERCLEANHAND – France (38)

Solutions for health protection by disinfection of hands

❖ Measurement Tools

HPROBE – France (38)

Speed up wafer-level magnetic test

❖ Industrial Manufacturing – Material and Transport Technologies

ORCHESTRA SRL – Italy

Digital intensive for Industry 4.0
